JAM SESSIONS

FOR TEENS AND YOUNG ADULTS WITH SPECIAL NEEDS

Do you have a desire to help others? If so, this opportunity is perfect for you! This program was developed to help teens with special needs, such as autism, learn the dynamics of building friendships, social skills and self-expression through fresh and creative avenues. Drawing on peers and professionals from the music community, this group experiences music recording, instrument exploration, improvisational songwriting, drumming and other projects based on the interests of the group.
